

SafetyLine with SPOT

Provided in partnership with Globalstar Canada

- Use your SPOT to Report to SafetyLine
- Satellite Communication *Out-of-Coverage Solution*
- GPS Location 
- Panic Button
- SafetyLine Check-In's
- Portable & Mobile
- Management for Multiple SPOT Units
- Intrinsically Safe Option

SPOT is the communications device.
SafetyLine is the Work Alone Monitoring Service.

SPOT is a great communication device to call for help in an emergency and log GPS location, in the same way that your cellular phone can be used to call 911 in an emergency.

SafetyLine is the monitoring service that automatically and continuously tracks the Worker via the SPOT communication device detecting when a Worker may need help (check-in timer and panic button), notifying trained responders, and providing the responders with information and instructions on how to respond.

Like the cellular phone, the SPOT device alone does not meet the requirements of Work Alone Regulations. The combination of Device and the SafetyLine Service provides a complete Solution.

SafetyLine

LONE WORKER

Devices vs. Functionalities

The following is a list of SafetyLine features available on supported device options. Users may interchange devices seamlessly between devices at any times. SafetyLine supports devices on any carrier network. SafetyLine is also developed to support an API, so any other 3rd party devices using standard protocols may be integrated. Contact SafetyLine for more information.

Dated: Q4 - 2011

LEGEND:

- - Fully supported.
- o - Optional. Available on some device models.
