

Mobile Worker Safety Monitoring

SafetyLine LONE WORKER

SafetyLine LoneWorker is an automated Work Alone Safety Monitoring solution.

The service is designed as one simple package to help Canadian organizations comply with Provincial Safety Regulations for staff working alone or in isolation.

The SafetyLine system automatically monitors lone workers by having them regularly Check-in, and in the event of an emergency situation, automatically notifies designated personnel of the incident so that assistance can be given to the lone worker.

Workers, Monitors and Administrators can interact with SafetyLine with the communication devices they already have. SafetyLine supports many interfaces, from simple telephones (satellite, cellular and land-line) as well as Mobile Smartphone Apps, Satellite devices, and a powerful internet Web-portal for computers, smartphones and tablets. SafetyLine provides flexibility to handle all of your staff's situations: One solution ideal for ALL workers.

SafetyLine

LONE WORKER

Canada's Leading
Work Alone Safety Provider
Since 1999

A powerful secured web interface allows for Monitoring and Administration on any web-enabled computer or tablet. The web interface is also available for mobile monitors in a touchscreen-friendly smartphone format. View User histories, location maps, and personal information to quickly respond to emergencies and locate distressed workers, then let SafetyLine prompt to perform appropriate actions. Every event is fully logged, and available on-demand with SafetyLine's customizable reporting tool.

24hr Check-In Monitoring

GPS Tracking & Maps

Logging & Reporting

Emergency Notification

Panic & Non-Response Alarms

Ease of Use

Voice Messages

Flexible Schedules with Check-in Reminders

Training, Consultation & Support

Integrate with SPOT Messengers, along with other Satellite devices for access when out of cellular coverage ranges. You can also use SafetyLine to manage your existing SPOT devices.

SafetyLine provides a simple automated telephone system for Check-ins and other reports, as well as Panic notifications, with simple speed dials. The telephone system also provides reminder notification phone calls, as well as emergency notifications to mobile monitors via text and call.

SafetyLine provides Apps for all of the major smartphone platforms (iOS, Android, BlackBerry, Windows). The apps provide a better user experience, and added features like GPS location, motion detection, text and voice reporting, check-in reminder notifications, dedicated buttons for Panic, Check-ins and all other standard SafetyLine commands.
