

SafetyLine

LONE WORKER

Devices vs. Functionalities

The following is a list of SafetyLine features available on supported device options. It should be used to help select the best device options for each of your SafetyLine Users. Users may interchange devices seamlessly between devices at any times. SafetyLine supports devices on any carrier network. SafetyLine is also developed to support an API, so any other 3rd party devices (ie. not on this list) using standard protocols may be integrated.

Please contact your SafetyLine Solution Consultant for more information, and to help decide which devices are best for your needs.

LEGEND:

- - Fully supported.
- o - Optional. Available on some device models.
- ‡ - Coming Soon
